

Production Pace Timers for the Industrial Laundry

Help your teams and management keep up with production goals with a visual display of actual output versus target. Unit displays current production target based on a pre-entered rate and actual units completed on a bright two-line, two/four-inch high numeric display. A percentage line is available as an option. Scoreboards can be used in a variety of industrial laundry applications:

- Steam tunnel (individual member and overall counts) or assembly areas
- Stock room (issues), linen (batches), mat (units), wash aisle (poundage), other processes

SPECIFICATIONS/FEATURES

Display: Two/four-inch high display of goal (red) and actual (green) with four or five digits. Memory saves display in power outages. RS 485/232 Computer interface for downloading data.

Rate: Goal can be set to change from one to 9999 seconds. Other versions available with fractional seconds. Switch allows goal to be halted during breaks or lunch.

Voltage: 110 VAC 60 HZ Single Phase

Control: Remote palm switch connected by cable inputs actuals on low-count operations and contains run/hold switch. Optional multi-digit inputs via key pad entry or pre-set amounts for larger batches. Unit can also be set up with optical or proximity sensors or other dry contact switches to automatically count results, for example, from a passing hanger. Another version allows count by scan of barcode.

Mounting: Wall-mountable. Optional post available at additional cost to clamp to work table
